This application contains claims directed to the following patentably distinct species: The species wherein a package type of the first semiconductor chip is a BGA a Wafer-Level Chip Size Package (W-CSP) and a Thin Quad Flat package (TQFP) or a Super Thin Small Outline Package (STSOP).

The species are independent or distinct because they are not disclosed as usable together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein a package type of the first semiconductor chip is a BGA a Wafer-Level Chip Size Package (W-CSP) and a Thin Quad Flat package (TQFP) or a Super Thin Small Outline Package (STSOP) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species from the species wherein a package type of the first semiconductor chip is a BGA a Wafer-Level Chip Size Package (W-CSP) and a Thin Quad Flat package (TQFP) or a Super Thin Small Outline Package (STSOP) that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

This application contains claims directed to the following patentably distinct species: The species wherein a package type of the printed circuit board is a Ball Grid Array (BGA) and a TQFP.

The species are independent or distinct because they are not disclosed as usable together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein a package type of the printed circuit board is a Ball Grid Array (BGA) and a TQFP for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species from the species wherein a package type of the printed circuit board is a Ball Grid Array (BGA) and a TQFP that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37

CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an

inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
